YOUNG LIVES SECONDARY SCHOOL SURVEY

Maths | Wave 2

You should have been given 2 documents: this **Test Booklet** and a separate **Answer Sheet**. Before you begin, read these instructions carefully.

Carefully read the questions in this **Test Booklet**. For each question, there are four options – A, B, C and D. Only one of these options is correct. Identify the option which you think best answers each question.

On the **Answer Sheet** given to you, find the corresponding question number and draw a cross ('X') on the option you want to select. Only select one option for each question.

Example

A	B	X	D
---	---	---	---

Please do not write on the Test Booklet. Use a separate piece of paper for any working out.

If you want to change your answer, blacken the entire square for your original answer and then write a cross ('X') on the new answer you want to select.

Example

X	B	C	D
---	---	---	---

Each question carries one mark. No marks will be deducted for wrong answers.
