

THE YOUNG LIVES STUDY COMMUNITY QUESTIONNAIRE

CONTENTS

Section 1	Physical environment
Section 2	Social Environment
Section 3	Infrastructure and access
Section 4	Economy
Section 5	Health and education

Community definition: Administrative areas will normally be used in the YLS to delineate communities as they have the advantage of being geographically well defined, well recognised, are often the level of policy allocation and sometimes the level at which secondary data is broken down to. The community may be smaller, larger or the same size as the sentinel sites and might include a whole village or a suburb in a city. In rural areas where the sentinel is part of a town the definition of the community should be taken as that individual town. In some rural sentinel sites only a certain percentage of children will be recruited from defined communities with the remainder coming from small villages or very scattered dwellings which have no clear community centre and where each household/village is effectively a community in its own right. In these situations there may be little point collecting community data and the questionnaire should refer to the entire district rather than individual communities.

Selection of informants: We anticipate that in most countries the community questionnaire will be administered by the field supervisor through interviews with key community leaders conducted during the community entry process. Possible key informants include: municipal/commune leaders, government officials, village headmen, child health nurses, headmasters, leaders of women's groups and religious leaders

Use of secondary data: In some cases it will be more appropriate to use existing sources of community level information, such as census records, than to collect new data. Countries must explore whether relevant data exists, assess the data quality (e.g must be recent have minimal levels of missing data and reflect both public and private sectors), whether the level of aggregation is compatible with the YLS and then obtain permission to use the data. Where appropriate secondary data should be entered in the questionnaire prior to the supervisors going to the field.

THE YOUNG LIVES STUDY COMMUNITY QUESTIONNAIRE

1	Community ID (OBSERVE)	_____	PLACEID
	Community name ☞ _____		PLNAME
2	ID of sentinel sites in the community (OBSERVE)	_____	CLUSTID1
