Overall support programs (this section helps to identify support programs in which YL households participate)

Ask the Community leaders, NGO and GOs (such as extension agent, health extension, school directors and others) if there are support programs provided by NGOs and GOs: list all NGO and GO activity since E.C. 2002 (G.C 2009). In doing so, it is useful to prompt the support programs and NGO support programs provided at the household and community levels in the country. Ensure that no projects are overlooked. If the community gets the same type of assistance from different organisations, use more than one line (i.e. one line for each organisation supporting the household).
